sent on 12/10/15

Dear Rev. Reiss,

In different ways and for different reasons, I've been in communication with 26 members of the ISSR about an absurd article titled "Entropy and evolution" published by the American Journal of Physics. Entropy is a variable in thermodynamics and has nothing to do with the evolution of stars or life. I've been trying to get the AJP to retract this absurd article for the past four years, as you can see from the attached article titled, "An Analogy Between Nazi Germany and the United States." My correspondence with two of your members is also attached.

Anxiety about religion is the root cause of how such a paper came to be published in a peer-reviewed journal. Mankind will benefit if the AJP does its duty because it will establish how irrational people can be about religion and science. All of my correspondence about this scandal is at <http://www.pseudoscience123.com>.

These are the 26 members: Denis Alexander, Francisco Ayala, Ronald Cole-Turner, Francis Collins, Christopher Corbally, Paul Davies, Celia E. Deane-Drummond, Willem B. Drees, Darrel Falk, Karl Giberson, Owen Gingerich, Nidhal Guessoum, John Haught, Randy Isaac, Antje Jackelén, Solomon Katz, Nancey Murphy, Ann Pederson, Karl E. Peters, Ted Peters, James C. Peterson, Michael Ruse, Robert Russell, John Teske, Wesley Wildman, and Gayle E. Woloschak.
