Faxed Sassaman2 6/10/14

Sent email on 4/29 and spoke to. Said that it was trash.

Dear Dr. Widnall,

Jason Pontin has not responded to my latest request for an appointment:

Edmund Bertschinger, Max Tegmark, and David Rotman know or should know that the AJP article is based on an incorrect application of the Boltzmann equation in order to refute the religiously motivated fallacy that evolution violates the second law of thermodynamics. To this list of MIT sleaze I'm adding the biologist Philip A. Sharp, who also ignored my faxes and emails. Sharp is the president of the American Association for the Advancement of Science and pays lip service to "Promote and defend the integrity of science and its use."

What you should do is schedule an appointment to see me and invite David Rotman. At that time, I'll explain the connection between genocide and pseudoscience and explain why Rotman should not be the editor of MIT Technology Review. This certainly is your business. The question is whether or not you have the character to carry out your responsibilities.

I'v attached the article in question. MIT Technology Review is involved because it published Georgi Gladyshev comments about evolution and thermodynamics, but did not publish my comments referring to http://creationwiki.org/Pseudoscience_in_the_American_Journal_of_Physics.

In effect, MIT Technology Review is helping the AJP perpetrate a fraud upon U. S. citizens. I explained this to Congressman Yvette Clarke in a 10 page indictment with 9 exhibits. I'd like to come to MIT to explain to Pontin, Rotman, Bertschinger, etc. the connection between thermodynamics and evolution.

Very truly yours, David Roemer sent Wolpert fax on 5/2/13 faxed P and M to Shiela on 5/25/13
