On 7/12/13 he responded for Don Winslow and said I should bring the matter up with SWINY. Sent him a long email asking for a moderator.

Sent Buzz link and Clarke letter on 3/10/14

sent letter with cc to Ron Winslow asking to post a discussion. 7/11/13

Dear Robin

I'm trying to the American Journal of Physics to retract an article about thermodynamics and evolution that promotes atheism. The attached open letter to Jesuits explains why the article is absurd. The AJP article proves that there is something rotten about the science culture in the United States.

I have been telling members of Science Writers LinkedIn Group and Science Writers in New York about the AJP article. I have met with nothing but hostility and indifference. I'd like to start a discussion about this topic on the website of the NASW. A moderator should be assigned to delete responses that accuse me of being an advocate of intelligent design or a creationist or that make no sense. This is an excerpt from a discussion I had on the website of the ASA:

DAVID ROEMER: A Boeing 747 doesn't have a temperature.

RANDY ISAAC: Yes, it does.

Randy Isaac has a Ph.D. in physics and writes about evolution. I asked the president of the ASA, Robert Kaita, to assign a moderator, but he ignored my request.

Since "NASW fights for the free flow of science news," I think you should let me start such a discussion.
