Dear Dr. Barendregt,

In different ways and for different reasons, I've been in communication with 27 members of the ISSR about an absurd article titled "Entropy and evolution" published by the American Journal of Physics. Entropy is a variable in thermodynamics and has nothing to do with the evolution of stars or life. I've been trying to get the AJP to retract this absurd article for the past four years, as you can see from the attached article titled, "An Analogy Between Nazi Germany and the United States." My correspondence with two of your members is also attached.

Anxiety about religion is the root cause of how such a paper came to be published in a peer-reviewed journal. Mankind will benefit if the AJP does its duty because it will establish how irrational people can be about religion and science. All of my correspondence about this scandal is at <http://www.pseudoscience123.com>.
