Dear David,  
Thanks for the lesson plan and links to the three articles. I'm glad your interdisciplinary work continues to develop. I'm on travels in Europe for talks and a conference. When I get a chance to download this, I'll take a look.

Dear Fr. Gionti,  
Fr. Maffeo gave me your email addresses:  
Upon information and belief, the Congregation for the Doctrine of the Faith wants me to educate the Catholic Church in the United States about the arguments for God's existence. My correspondence with the Catholic Church is here:  
<http://www.newevangelist.me> ("Rational Arguments for God's Existence: Why Evangelizing is Good and Proselytizing is Bad") See also:

According to the website of CTNS, there is a collaboration between the Vatican Observatory and CTNS. The CTNS rejected my submission to Theology and Science titled, "An Analogy Between Nazi Germany and the United States" (<http://www.pseudoscience123.com/good-evil/cope.html>) for disingenuous reasons. I've attached my correspondence with the editors Ted Peters and Robert Russell as well as the article. It is about an absurd article titled "Entropy and evolution" published by the American Journal of Physics. Fr. Robert Spitzer, S.J., of the Magis Center is not behaving honorably about this matter either.

I've brought this matter to the attention of the Holy Father in my complaint against Cardinal Dolan for suppressing my slideshow about the Shroud of Turin (see: <http://www.dkroemer.com>).

I am also under the impression that the Congregation for the Doctrine of the Faith wants me to educate the Catholic Church in America about the arguments for God's existence (see: <http://www.newevangelist.me>).  
Very truly yours, David Roemer
