I am hoping you will take an interest in this matter because I believe it sheds light on the Holocaust. In Nazi Germany, no one was ever forced to kill anyone. However, there were severe penalties for telling about the murders. In the 21st century, the entire scientific establishment in the U.S. is helping to cover up a mistake the American Journal of Physics made in publishing an absurd article about evolution and thermodynamics. The article undermines the integrity of science and gives Islamic terrorists real evidence that American is the "Great Satan." The article reminds me of the famous Piltdown Man hoax. The attached certificate of mailing is for an ignored request to explain this matter to the President of Yeshiva U.
